

Name: _____

THE WORLD-FAMOUS JANE GOODALL

Dr. Jane Goodall was the first person to study chimpanzees in the wild! She learned many new things about chimpanzees.

“When I was 10 years old and I said ...

I want to go to Africa and write books about animals!

... everybody laughed at me. Girls couldn't dream of doing that.”

Jane kept dreaming. And then worked hard to make her dream come true.

It All Started with Reading

Jane loved to read. Two books Jane read as a child led her to dream of going to Africa. What are the names of these books? Circle every other letter.

Arriving in Africa

In July 1960, at the age of 26, Jane was finally able to travel to Africa. She got a job studying chimpanzees in the country highlighted on the map.

Use the code to discover the country's name.

T

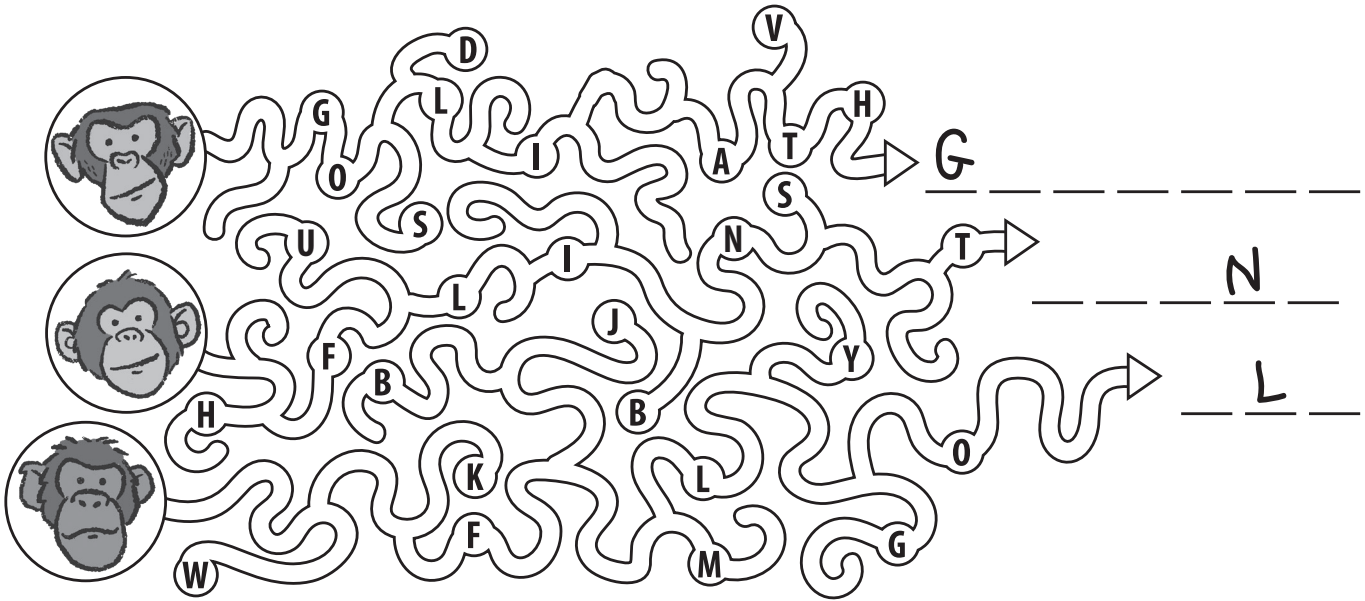

Name: _____

Naming the Animals

Before Jane, chimps were each given a number. Jane was different. She gave the chimps names based on their appearance or personalities. For example, she named the chimpanzee that first approached her David Greybeard because he had a gray chin.

Use the letters found on each correct path to discover the name Jane gave each chimpanzee.

Jane's Discovery

Replace the missing words.

Jane was the first scientist to see chimpanzees make and use _____.

Jane observed a chimp using a _____ of grass as a tool.

The chimp put the grass into a termite _____ to catch termites to eat.

She also saw chimps _____ leaves from twigs to make a tool. And she _____ chimpanzees use rocks to crack open nuts.

Standards Link: Language Arts: Read a variety of genres (biography).

Name: _____

Kid Scoop Together What Do You Know?

Do you know the answers to these questions? If not, find them on these activity pages!

1. Where did Jane dream of going when she was a child?

2. What is the name of Jane's favorite toy?

3. What did Jane see chimpanzees use?

4. What did chimpanzees use rocks for?

5. Name one of the books Jane love to read as a child.

Follow Dr. Jane Goodall

Dr. Jane Goodall has spent much of her later years protecting chimpanzees and preserving the habitats of animals throughout the world.

She believes that everybody has the power to build a better world. The Jane Goodall Institute's Roots & Shoots program helps young people care for others and the planet. With a parent, visit rootsandshoots.org.

Standards Link: Science: Understand different life forms thrive in different habitats.
