

BLOOD MOON

www.kidscoop.com

On March 14th a total lunar eclipse will be visible in the Northern Hemisphere. The timing is such, that this is also a full moon known as the "Blood Moon." This week, *Kid Scoop* explains why a lunar eclipse occurs and the reasons why this March moon is being called a Blood Moon.

Each week, *Kid Scoop* brings students interactive games, activities, puzzles and more in a bright & bouncy, award-winning feature kids and their family members can enjoy together.
